

NEW PRODUCT RELEASE

**HIGH CAPACITY BAGS
550 SERIES**

FTC has combined its Deep Pleat Bag Product Lines (HC-550) and (DP-600).

The new series is designated as the HC-550 series. This new series incorporates the advantages of both product lines while eliminating the deficiencies. This consolidation helps us offer a superior product while maintaining cost competitiveness.

Surface area and dirt holding capacity has increased, positive sealing and cap options are optimized, media selections are greater, while overall length has been decreased to minimize disposal costs.

Please view our website for the “new” HC-550 brochure.

FTC would like to thank you for your continued business.
